

Special Educational Needs Policy

Children with additional needs will have their needs met through the creation of an inclusive environment. A child with special needs will be included in everyday routines, appropriate to their ability. I will provide relevant activities that promote their welfare and development. I would seek information and share knowledge with parents regarding their child's individual needs. Activities will be adapted to ensure your child has every opportunity to take part. If necessary, specialist equipment will be accessed and I would seek advice from other professionals and organisations.
